I really liked this game It's a fun little point and click adventure set in a fairy tale world, with talking donkeys and stupid rhymes, that made me laugh out loud sometimes.

Glad to see games like this, who know what story they want to tell and how to do it right.. It's like tiny, very casual (VERY) child of King's Quest series You see some gnomes, witches, fairies and other fairytale's cliché heroes and do "go there, bring this" to make wedding cake, but atmosphere, funny goofy writing and music support interest to play on.. Nice and intuitive puzzle-design If you don't mind it being short it go for it Sweet little point and click adventure in a world filled with silly rhymes and charming ascii art.. Easy the intuition goes and lack the game does any woes, enjoy this ride of yours so fast as I will wait for episodes more at last.. Honestly, I ABSOLUTELY don't know how and why this slideshow-game manage to be so enjoyable.. The Pepper Prince is a point-and-click adventure for everyone Enjoy the whimsical characters and silly rhymes as you solve painless puzzles and let the minimalist ASCII art take your imagination on a relaxing journey through this sweet little kingdom.. Each episode is a 30-60 minute adventure continuing your quest to help your friend in need.. The sound, oh my dear friend Is key for one's mind to bend, Around the story that's told here Experienced with few a gear.. So when they are called upon by their friend, the pepper prince, they decide to bake them a very special wedding cake! Unfortunately things don't work out as planned and soon there's a mysterious change in weather, a disappearance, and a broken heart to be mended.. a09c17d780 Title: The Pepper Prince: Episode 1 - Red Hot Chili Wedding Genre: Adventure, Casual, Indie Developer: Hypnotic Owl Publisher: Hypnotic Owl Release Date: 3 Jan, 2019 English Very cute and somewhat short (episode 1) adventure-game with very retro graphics but full mouse controls.

Only one nitpick I can name - lack of 'model' for character Camera perspective not from the eyes of hero, so there be logic to but @ on screen, wich walk from screen to screen as a character.
